INTRODUCTION

Blockchain concepts such as web3.0, DeFi, and Metaverse have been gaining interest from the crypto and the business world. Blockchain refers to a decentralized and digitally administered public ledger that exists over a network.

With the increasing use of this technology in multiple virtual facets and its indispensable applicability, it is no wonder that it has made its way into e-commerce as well. Key features of the blockchain include the ability to make transactions safer and faster, transparency, and reduction in transaction/investment cost. These features are factors of success when it comes to driving eCommerce growth

Within e-commerce, this phenomenal ledger provided by blockchain has multiple applications. It allows E-commerce business owners to both electrically and manually store and share digital assets, such as their product information and their customer's data, with utmost security. Furthermore, blockchain offers features to the world of e-commerce that allow both sellers and buyers to have seamless experiences with shopping and selling online.

A smart contract is a key feature of Blockchain Technology and is simply a computer program that automatically executes, control, or document relevant events and actions according to defined terms of a contract or an agreement. The objective of a smart contract is to reduce or eliminate the need for trusted intermediates, reduce delays, ensure speedy transactions, and reduce fraud or malicious activities.

Currently, many projects and businesses utilizing blockchain technology are focused on entertainment, especially gaming, but JIFFYSTOCK is seeking to revolutionize the trading business sector.

INTRODUCTION TO JIFFY WORLD

JIFFY WORLD is an ecosystem comprising of renounced applications, and innovations with the aim of revolutionizing the E-Commerce sector and building projects that are focused on making the business trading world a better place, reducing business time and costs, safe business environments, ensuring transparency and trustworthy, fast deals and communications in a jiffy. Hence the project name, JIFFY.

Jiffy World focuses on any type of business trading; Physical trading, providing services, and many more. Our ecosystem consists of three main innovative parts;

- The JiffyStock Platform
- The Jiffy Tokens
- Jiffy Loyalty Cards

In comparison with the traditional E-commerce system, we offer unique value propositions in the provision of idea launchPads, B2B contract referring and execution, logistics, and many more.

We are the first of its kind anywhere. Our partnerships, alliance, referral, and community development and trading initiatives offer enlightenment that offers what competitors lack.

As time goes on, we'll be working on more projects and platforms that enhance the E-commerce sectors and present amazing opportunities that offer real-life value. Our value proposition is different and unique from what you have anywhere in the world.

THE JIFFY TOKEN

\$JIFFY is the native token of the JIFFY ECOSYSTEM. It is a utility token built on the Binance Blockchain Network (Binance Smart Contract), and has a fixed supply of 1 billion units. Our token is designed to bridge blockchain utility to real-world utility, Hence it can be used to pay for services on our JIFFYSTOCK PLATFORM (B2B MarketPlace), or any future projects that belong to our company, USA SOLUTION CREATORS TECHNOLOGY and to get offers and discounts through our Jiffy Memberships System.

\$JIFFY is not promising you high ROI or a big percentage of money back compared to most pumps and dumps as many do have high risk. It has a real-life use case, a high-value service you can get from our platform, and Jiffy loyalty cards.

\$JIFFY USE-CASES

Utility Token: The token is backed by real-life utilities as it can be used to pay for services on the JiffyStock Platform (B2B MarketPlace), or future USA solution Creators Projects. Holders can use our token to get offers and discounts through our Jiffy membership system, to vote on some critical decisions, etc.

Voting Power: Depending on the number of tokens locked. Holders have the power to participate in the decision-making of the Jiffy ecosystem through voting. The voting power is equal to the weight of the tokens locked by each holder.

HOW \$JIFFY MANAGES RISK, AND REDUCES VOLATILITY?

Cryptocurrencies are very volatile with a very high risk of losing funds. Unlike digital currencies, Jiffy Token is a utility token with planned-out strategies and innovative structures to reduce or manage risk and volatility.

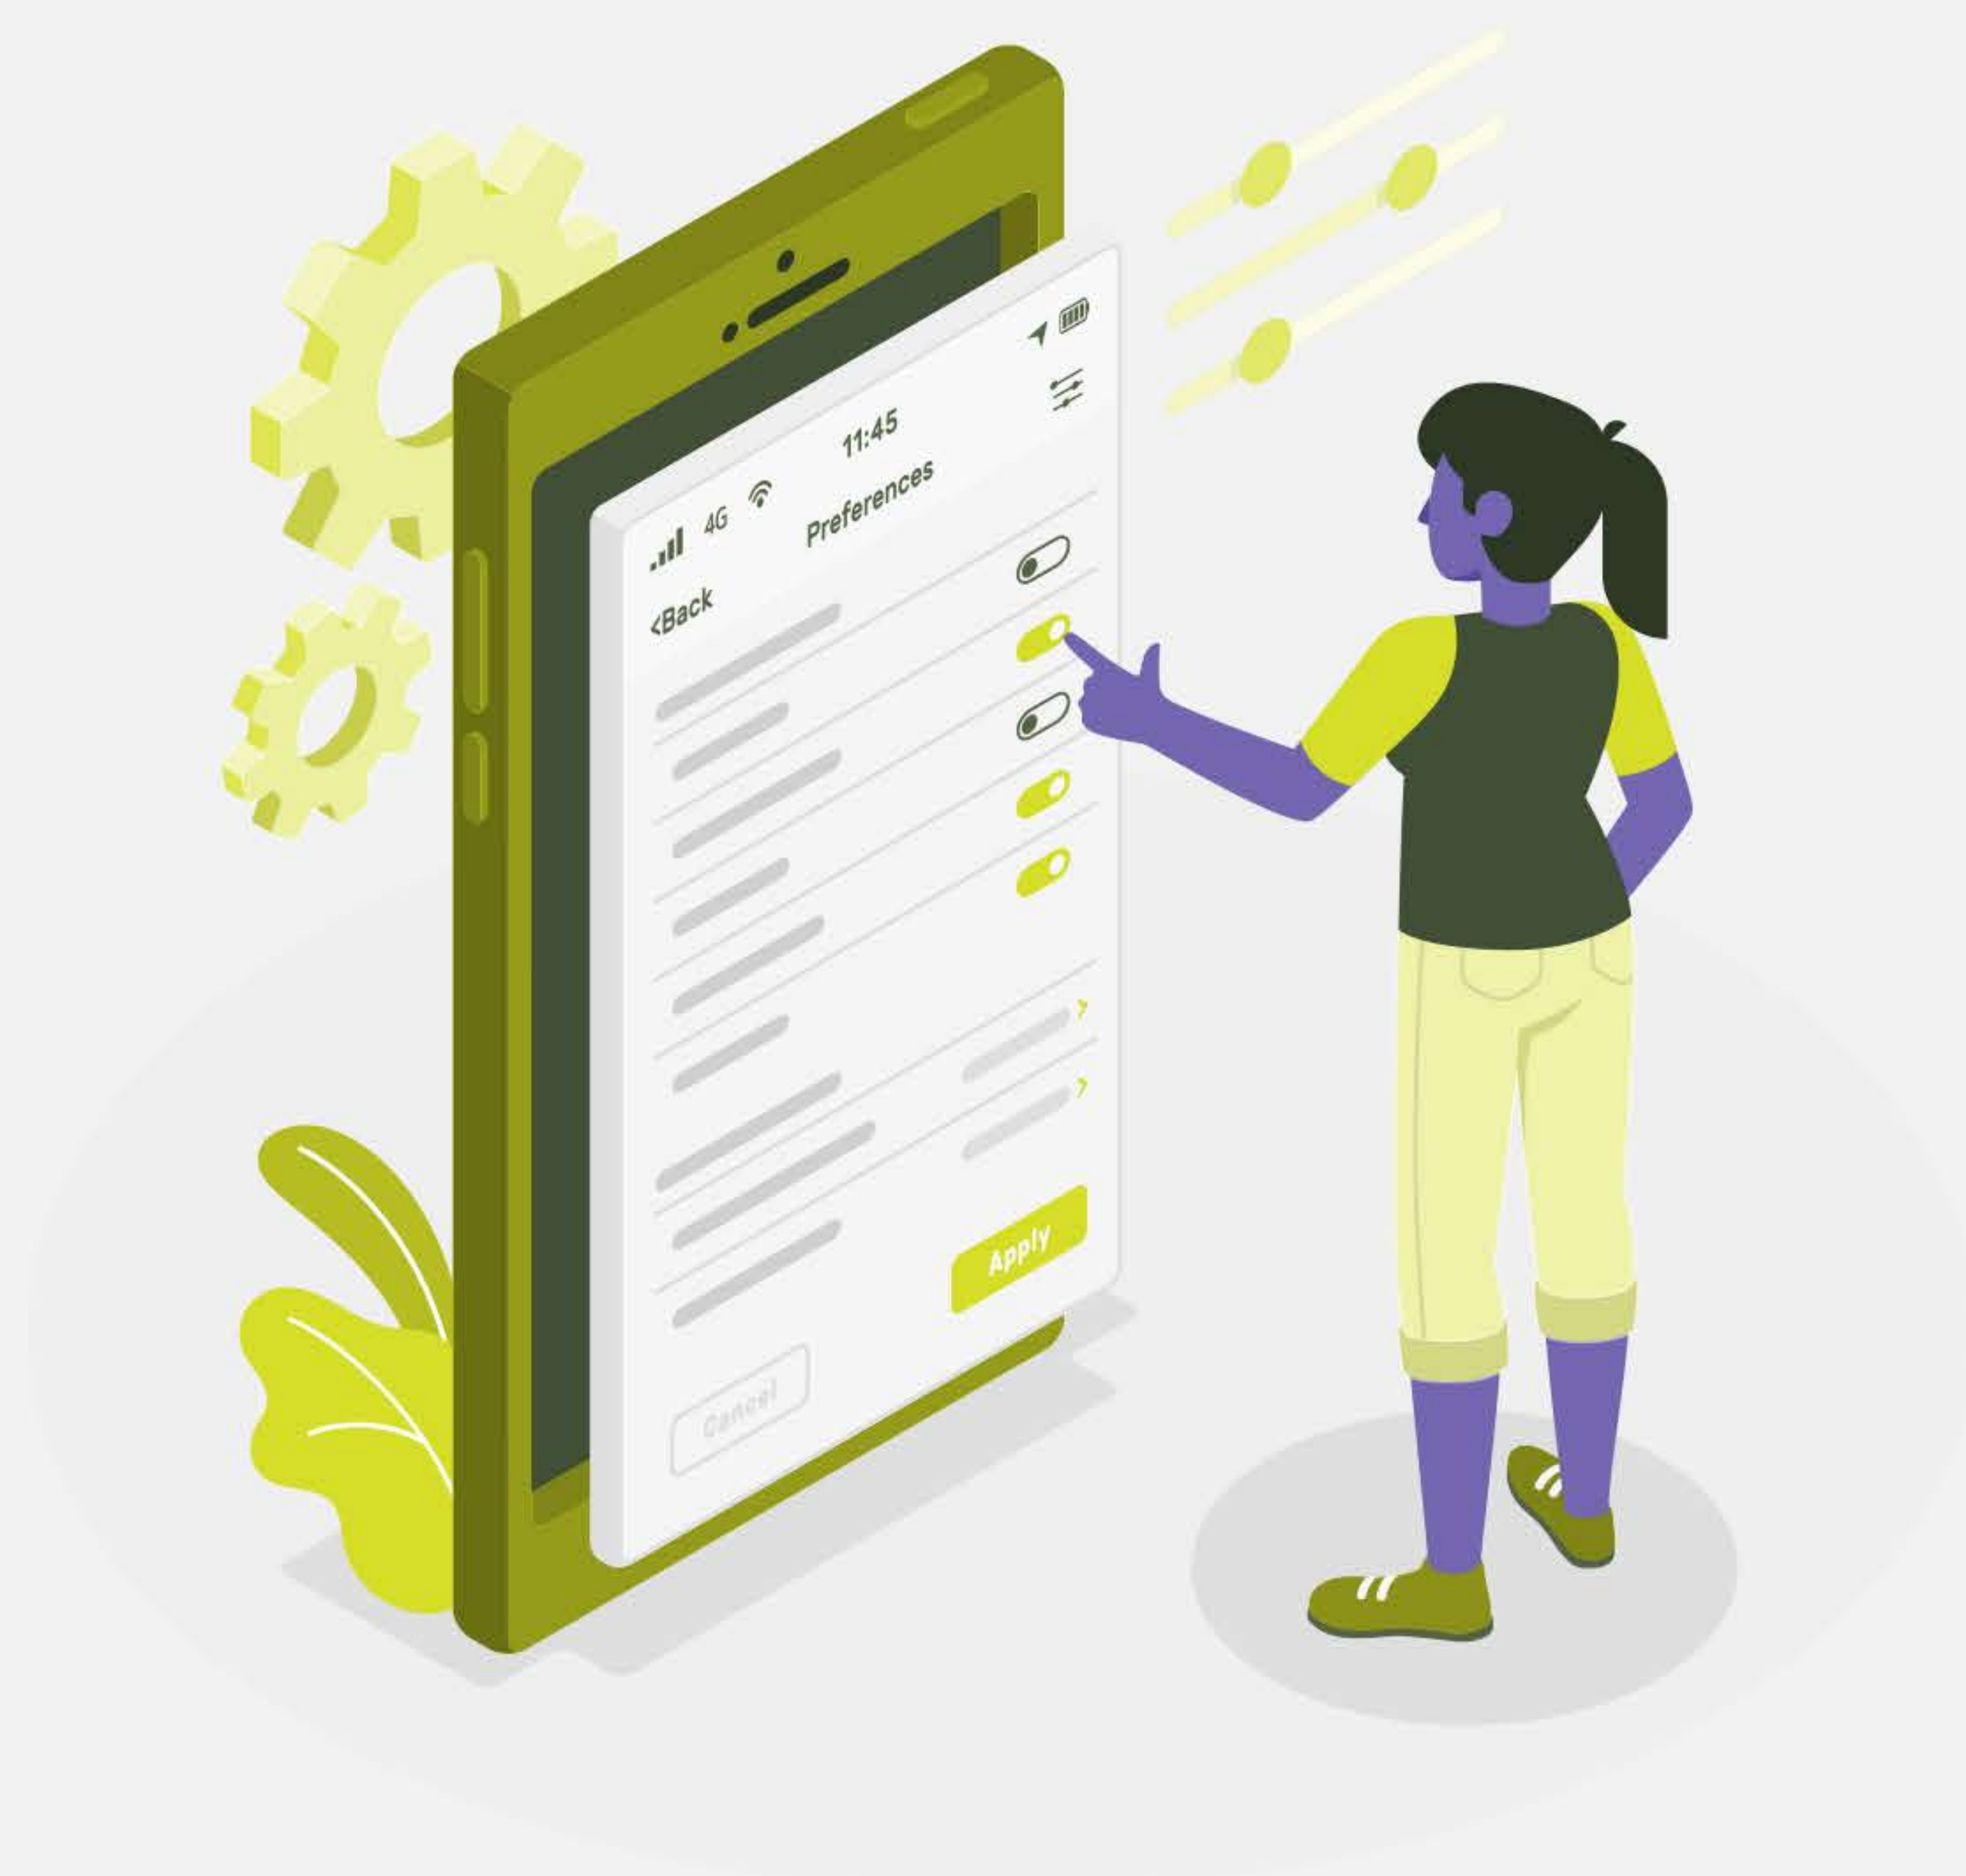

We have a structured token economy that encourages investors to buy and hold our token. Also, we secure the jiffy token with two strong innovations (JiffyStock Platform and Jiffy Loyalty Cards) to get the holders maximum benefits on the long run.

\$JIFFY FEATURES

Locking and Vesting Mechanism: We have a well-structured locking and vesting mechanism that prevents intensive dumping of the tokens or rug- pulls even from the pre-sale stage till the launch and long-term goal. The vesting schedule enhances the stability of the token value and helps to boost popularity and attracts many investors.

Anti Whale: The token contract is built to withstand any whale dumping. There is a maximum sale of 300,000 tokens per wallet. This is to prevent whales' manipulation in the market.

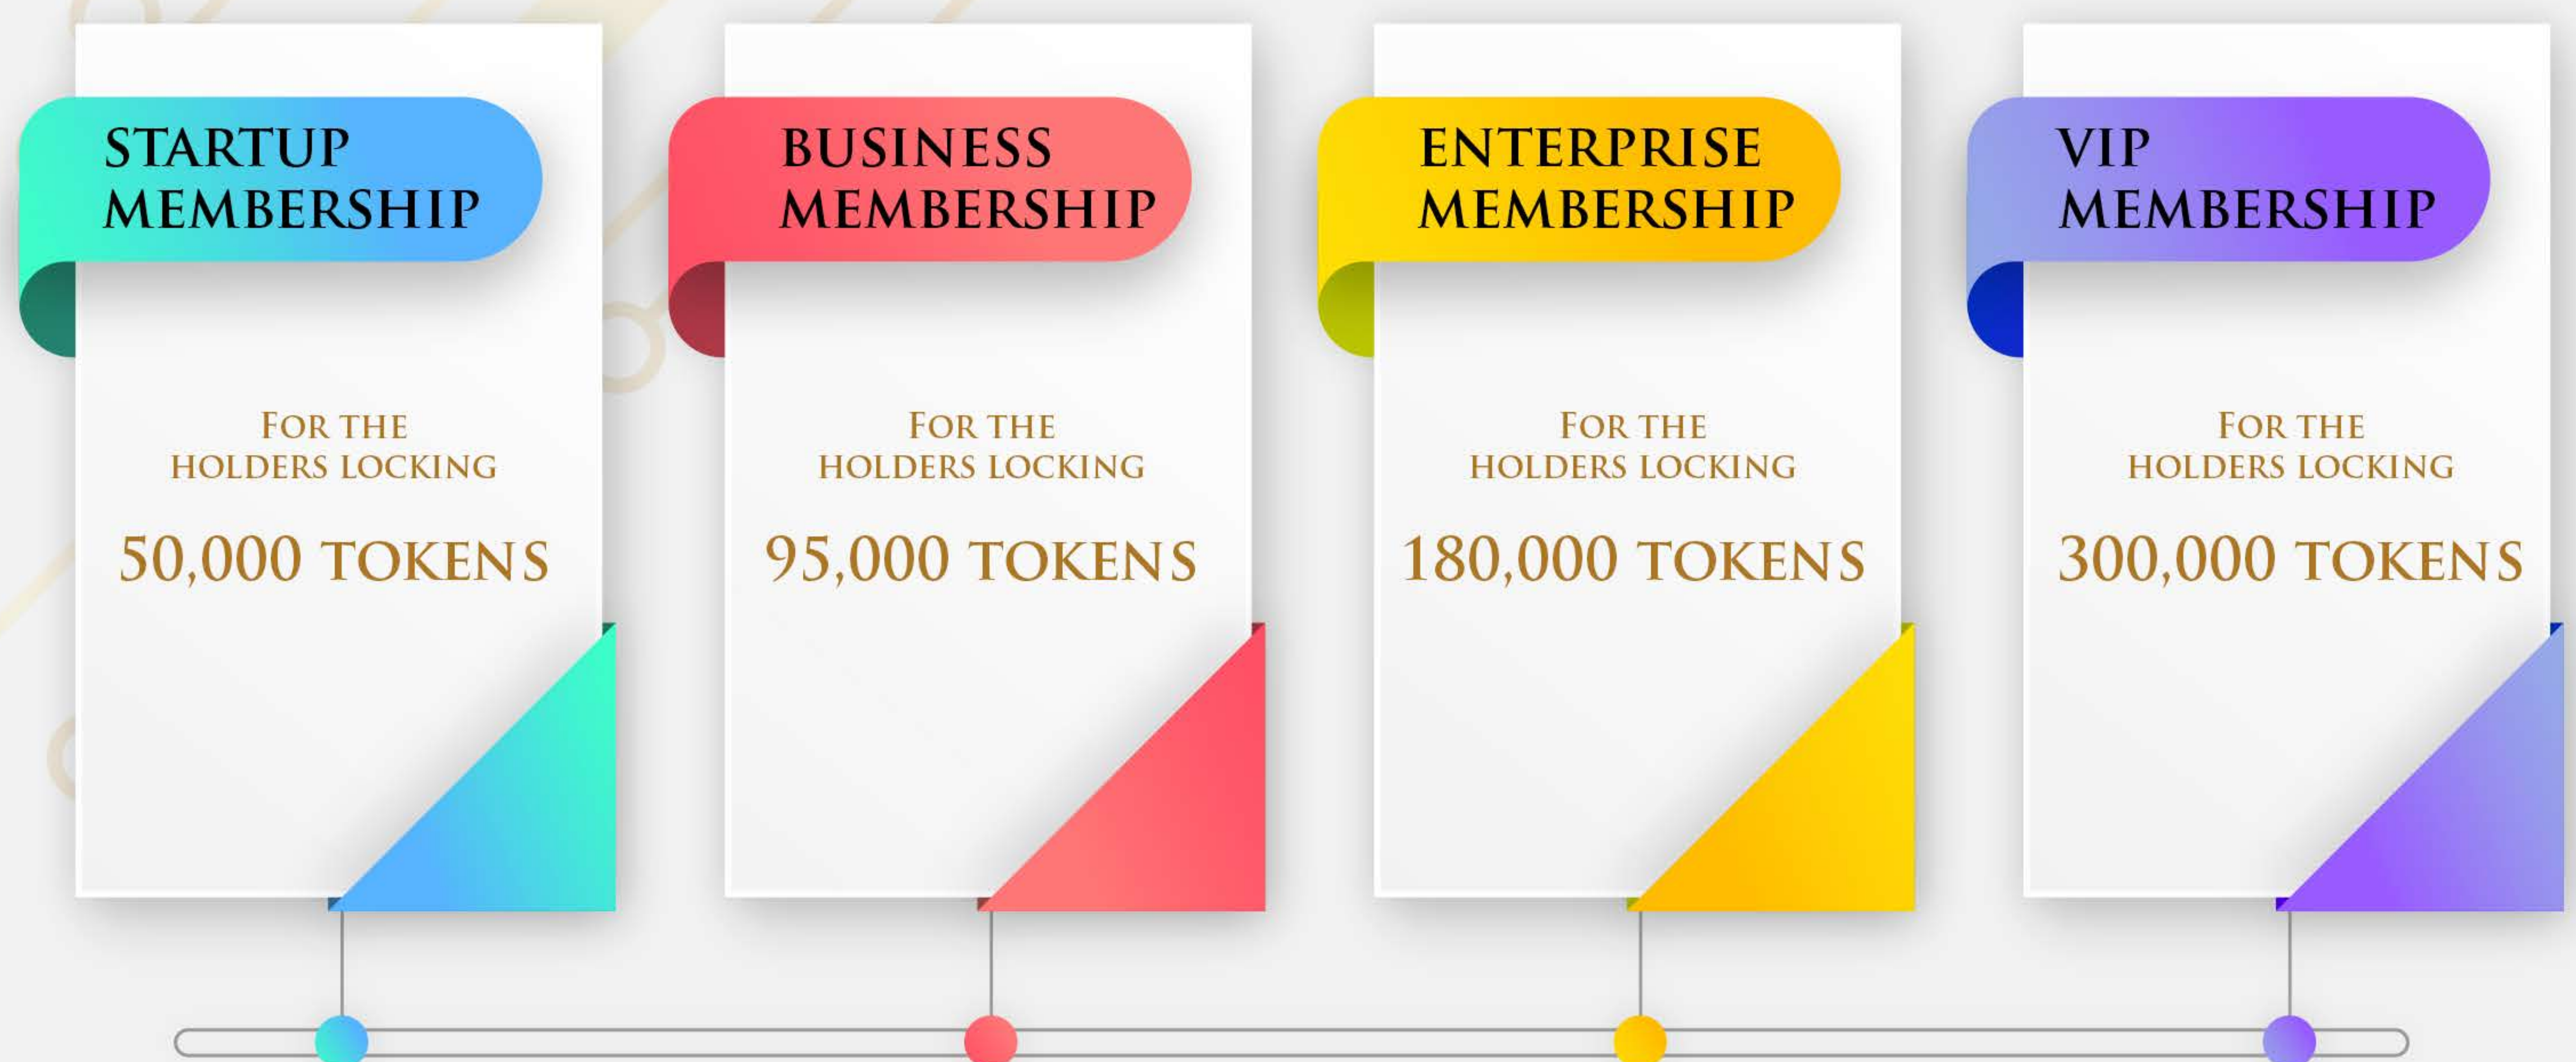

Sell Tax: Token has a 5% selling tax for the first year and later 3% after the first year. This is done to prevent unnecessary sell-offs or market manipulation at any point. Also, the fee generated would be used for further project marketing to further increase our market expansion.

\$JIFFY MEMBERSHIP SYSTEM

\$Jiffy membership system is the system where users lock their respective tokens using the blockchain technology, Smart Contract. This is done to activate the Jiffy loyalty cards that get them a free store on the JiffyStock platform (B2B marketplace). However, users have the opportunity to sign up for another contract to rent this store. This opens them to enjoy offers and discounts from the company, USA SOLUTION CREATORS TECHNOLOGY, and our partners. We have four distinct membership packages available;

HOW IT WORKS?

The membership system works in a way that the token holders lock their tokens in our Jiffy Membership System utilizing smart contract technology. Locking a certain number of tokens depending on the membership package you choose to activate the Jiffy Loyalty Card and earns you a free store on our Jiffystock Platform (B2B marketplace). However, users have the opportunity to sign up for another contract to rent this store. This opens them to enjoy offers and discounts from the company, USA SOLUTION CREATORS TECHNOLOGY, and our partners.

JIFFY TOKEN AND JIFFYSTOCK PLATFORM

A brief look into the traditional E-commerce platforms like Alibaba, eBay, and others, and the challenges faced by users of these traditional platforms. One of the challenges is the annual renewal of their membership package and the high tendency of increasing the package prices depending on the platform's management decision. That is, each user is required to keep renewing their packages every year with fiat currency in order to ensure the continuity of enjoying the discounts and offers on their platform.

Whereas the Jiffy locking system is designed in a way, users are to pay one time in their life using our utility token, \$jiffy, and then lock the tokens in our Jiffy membership system. This helps to eliminate the concern of annual package renewal as users keep using the same token lock every year.

Case Scenario:

VIP Package 1st year: 300,000 \$jiffy bought at \$0.02 = \$6,000

VIP Package 2nd year: 300,000 \$jiffy bought at \$0.05 = \$15,000

Imagine someone who pays \$6,000 to activate the VIP Jiffy loyalty card in a in a year, then the following year, instead of paying \$15,000 for the VIP VIP Package, the same number of tokens can be relocked in the Jiffy membership system to enjoy the VIP Package benefits

Also, the JiffyStock annual package price will be reviewed every 6 months by the JiffyStock Marketing Department with the authority to increase or decrease the package price. However, holders have voting power on some critical decisions.

FUTURE OF JIFFY TOKEN

To ensure uniqueness, security, and transparency within the JiffyStock Platform.

JIFFYSTOCK PLATFORM

JiffyStock Platform is a B2B Multi Vendor wholesale platform where buyers, sellers, investors, and logistics solution providers across the globe meet to exchange products and services. It is a major platform that projects other opportunities by connecting sectors like stores in our marketplace.

It envisions integrating blockchain technology and implementing a crypto escrow system that eliminates untrusted intermediaries. A platform that focuses on reducing delays in business transactions and costs, ensures a safe business environment, transparency, trust, fast deals, and communication in the business trading world.

We are creating a system that facilitates easy access to finance, and easy access to products and services irrespective of location. Unlike the traditional or old E-commerce platform, it is designed to enhance users' experience, improve speed, and include all the necessary tools that a customer company might need to build its online wholesale business.

There are three versions of JiffyStock Platforms, each version advancing in incentives, and benefits for its users.

- BETA VERSION

This is our first version with aims and benefits for its user. This will be the first step toward bridging the present technology and the future technology that depends on blockchain technology. We aim to provide the best world cheapest B2B wholesale platform, which would give everyone the opportunity to start up their trading business without being afraid of high costs. This version gives room for those who know little or less about the crypto or blockchain space to utilize and explore our platform.

- MEGA VERSION

This version unveils our plan for jiffystock platform (mega) with the integration of many blockchain solutions that can be helpful to increase security, safety, transparency, and reduce business costs in comparison with traditional ways. We will add many extra features, and implement the Crypto Escrow System that serves as a mediator service to ensure transparency and trust between businesses.

- PREMIUM VERSION

Jiffystock platform (final solution) will be totally updated with last technology of blockchain and web3. This will involve massive adoption and implementation of Web3 and blockchain technologies.

JIFFYSTOCK PLATFORM'S VALUE PROPOSITION

1. JiffyStock platforms stand as the bridge between the old E-commerce Platform and the future of technology via the adoption and utilization of blockchain technology
2. It envisions being a decentralized platform that connects buyers, sellers, and investors to builders, eliminating any 3rd party.
3. It ensures a transparent, secure, and trustworthy business environment.
4. Investment costs for online trading businesses such as 3rd party commissions, transaction costs, legal fees, contracts costs, etc are being reduced to the minimum level.

WHY JIFFYSTOCK PLATFORM IS A BETTER CHOICE?

1. Jiffy Stock platforms offer modern trading solutions.
1. The platform is open to all types of sellers.
2. Our aim is to revolutionize the old traditional E-commerce business trading ways.
3. The platform is designed to make a free and low-cost trading environment.
4. We provide rooms for sellers to sell all kinds of products and accept the crypto payment which is a step towards breaking the old chain.
5. There is no hidden fee or commissions.

REVENUE MODEL

Jiffy Stock Platform is working to provide the lowest cost investment cost to sellers and the modern trading industry. We are a marketplace that offers trade, finance, wealth creation, and capital growth.

We have packages according to the needs of every seller and business where you can pay a one-time fee in order to get all the tools needed to further develop your business on our platform.

We are providing these benefits not because we want to be competitive with every other trading platform, but because we want every type of seller and business to grow to higher levels.

BENEFITS OF ADOPTING CRYPTOCURRENCY IN JIFFY STOCK PLATFORM.

- LOWER TRANSACTION COST

The cost of blockchain transactions is noticeably lower than the transaction cost of traditional e-commerce. When a brand's traditional eCommerce platforms pay an average of 3-4% on each transaction, compared to cryptocurrency transactions which are infinitesimally low. Therefore to ease transactions, we are incorporating crypto payments into our platform.

- REDUCES FRAUDULENT ACTIVITIES

Cryptocurrency payments are chargeback-proof, that is transactions using cryptocurrency are not subject to chargebacks. This is very helpful to our sellers, as chargebacks drain revenue. Crypto payments are permanent. Cryptocurrency transfers on our platform will be placed in escrow until both parties confirm the transaction. Once that is finalized and recorded in the blockchain, it cannot be reversed.

- MARKET EXPANSION

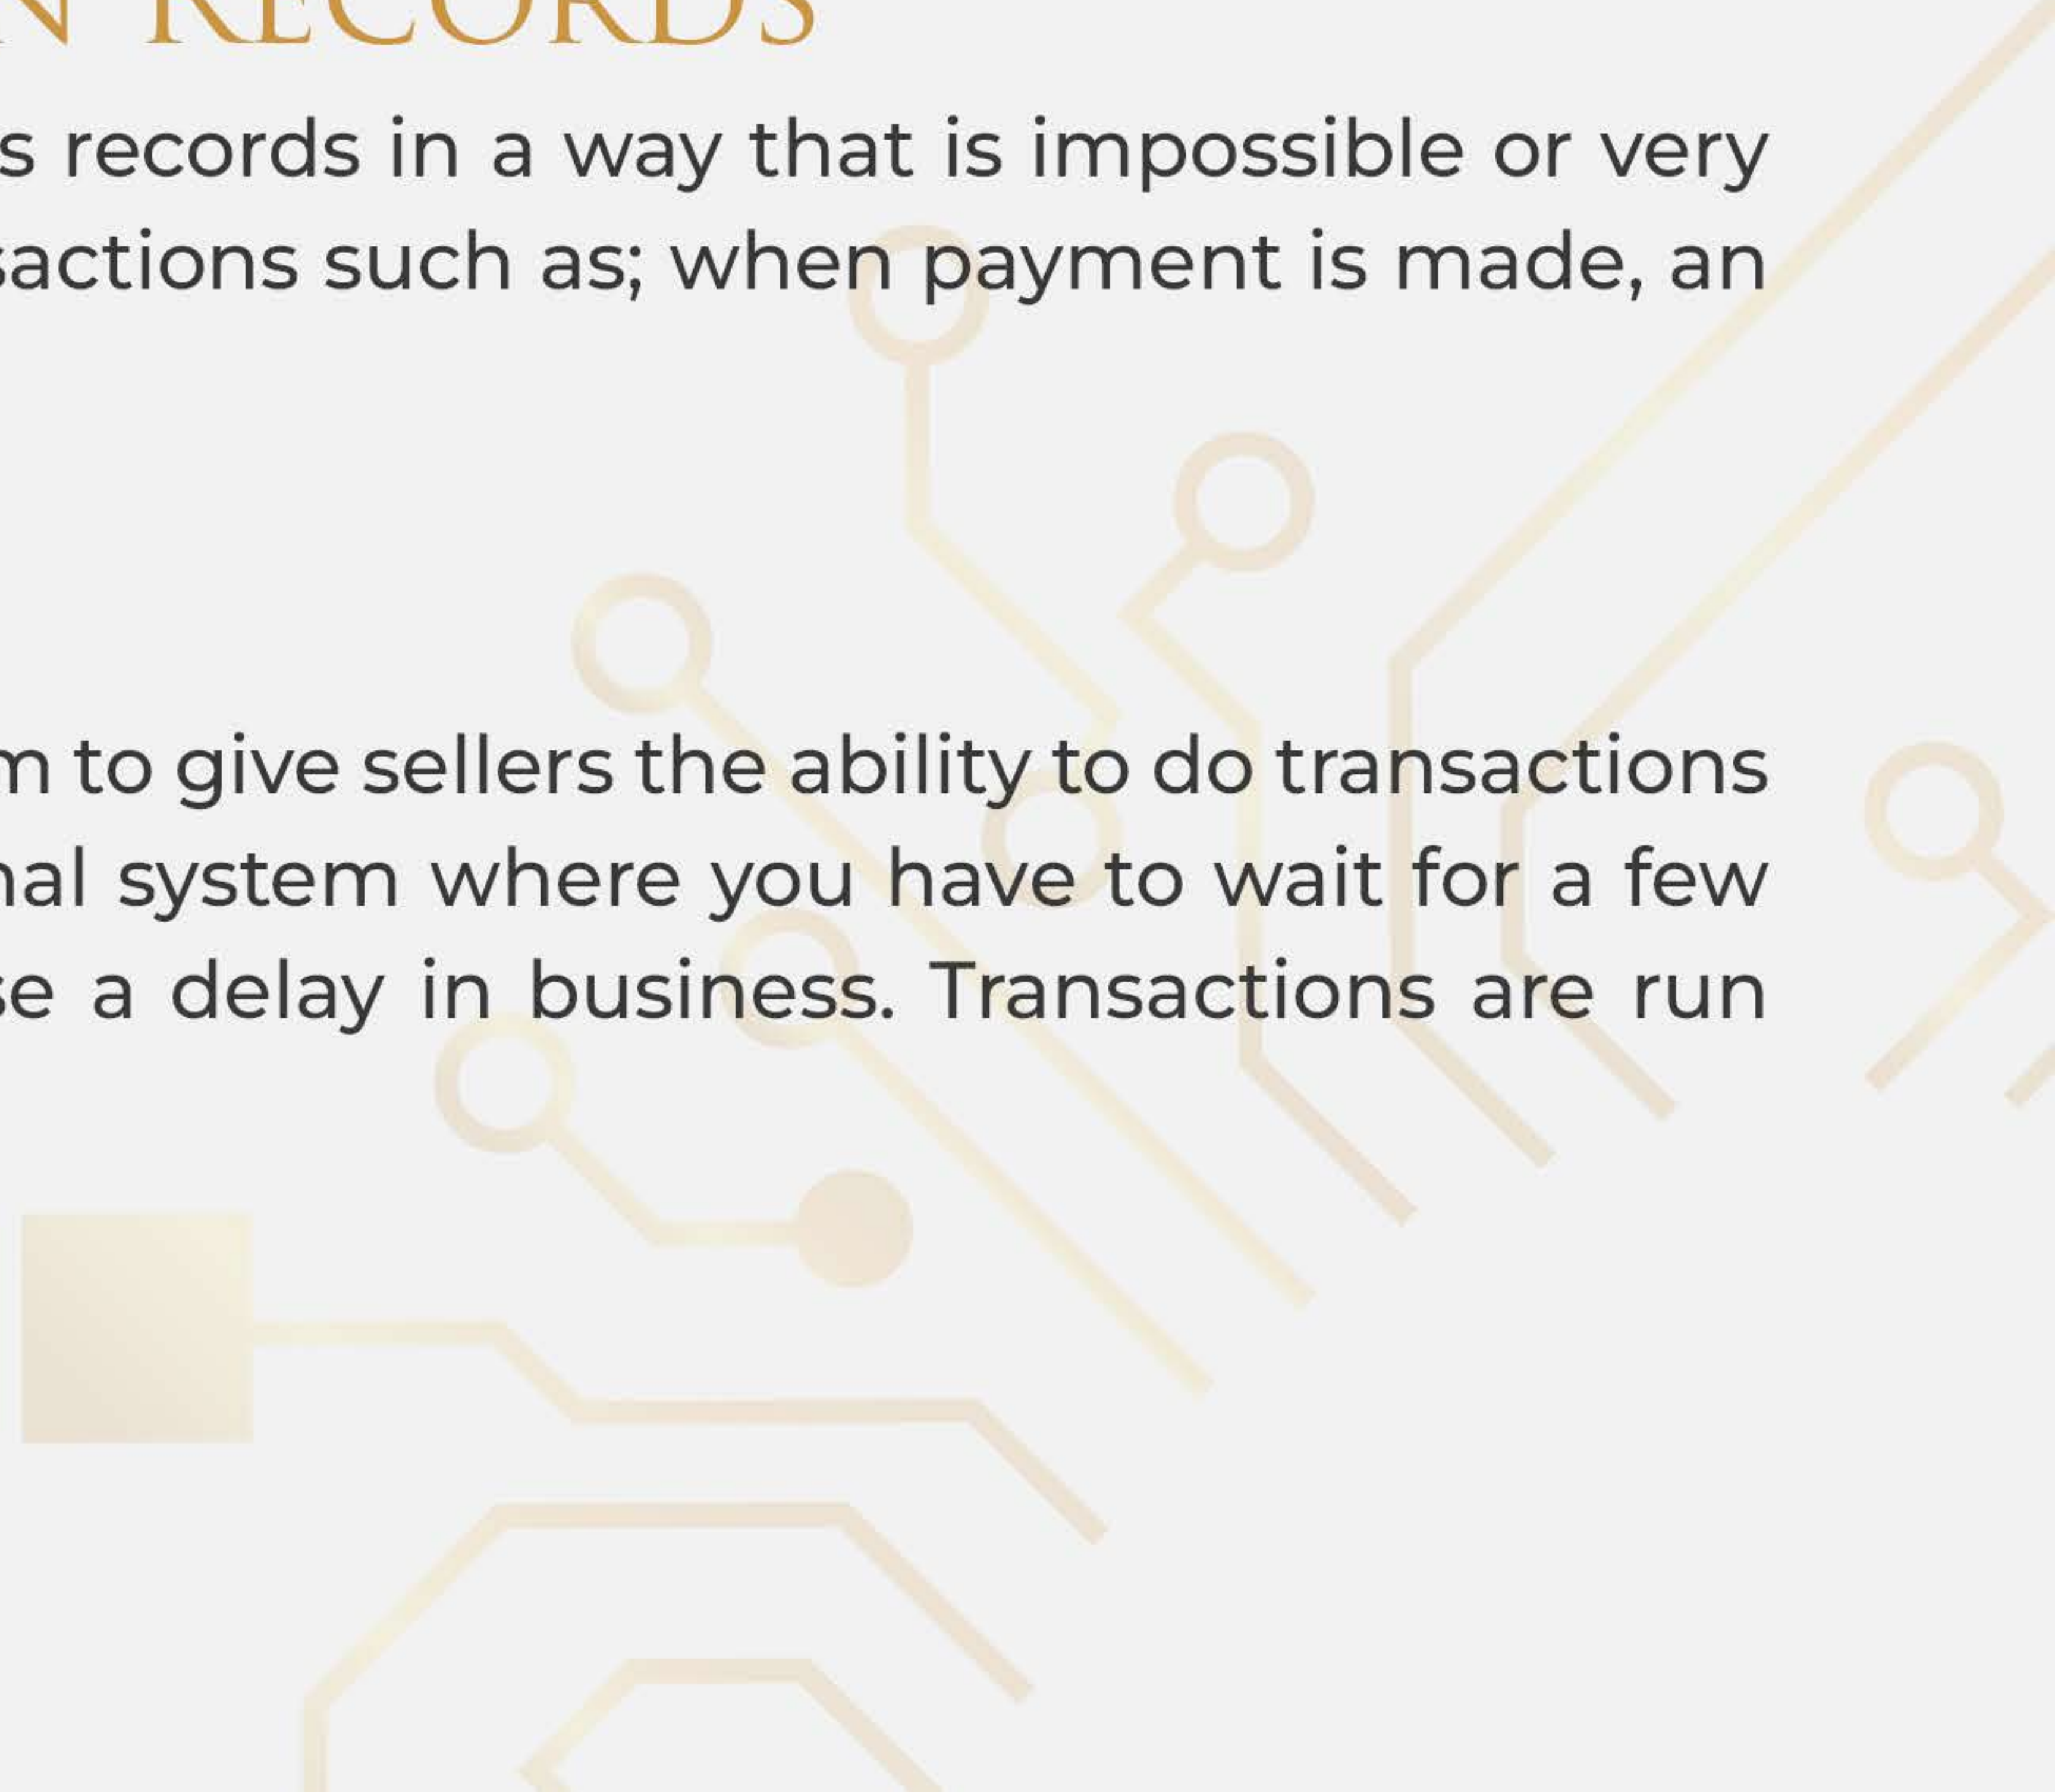

There has been rapid growth in the adoption of cryptocurrency. Cash-like transactions between buyers and sellers, not subject to Banks or government regulation, make it especially attractive for commerce in the underdeveloped marketplace. Jiffy Stock Platform has the edge to expand to these areas and increase sales volume in these markets.

- SECURE TRANSACTION RECORDS

Blockchain, is an online ledger that keeps records in a way that is impossible or very difficult to hack. It records payment transactions such as; when payment is made, an entry is published in the blockchain

- SPEED

Via the adoption of cryptocurrency, we aim to give sellers the ability to do transactions at the highest speed. Unlike the traditional system where you have to wait for a few days to confirm transactions which cause a delay in business. Transactions are run within seconds

FUTURE OF JIFFYSTOCK PLATFORM

To become the leading worldwide trading business, developing and implementing solutions for the progression of human value exchanges, and with the adoption and utilization of blockchain technology.

JIFFY LOYALTY CARDS

- WHAT IS IT & WHO CAN GET IT?

Jiffy loyalty cards are similar to Promo Card/ Loyalty Card /Offers / Coupon Codes / Discounts: Vouchers listed by vendors gift cards which give their holders the opportunity to offer discounts according to the card level. The buyer of this card will get free Jiffy tokens for holding it at the Jiffy membership system to activate the card. Jiffy loyalty card makes sense of belonging, increases our holder's satisfaction and creates a culture of appreciation, gives the power of decision making, increases internal communication, and helps sincere partners stay in the company.

- DIFFERENCES BETWEEN JIFFY LOYALTY CARDS AND GIFT CARDS

Jiffy loyalty cards are not gift cards. They are much like Promo Card/Offers / Coupon Codes or Vouchers listed by vendors which give their holders the opportunity to offer discounts. Gift cards are valid for one year and need to be renewed every year While Jiffy Loyalty cards can be a lifetime on holding them. Our loyalty cards are meant to be kept by our customers and to foster redemption or more earnings on the platform, unlocking discounts and offers from the company, USASC, and our partners.

LEVELS OF LOYALTY CARDS?

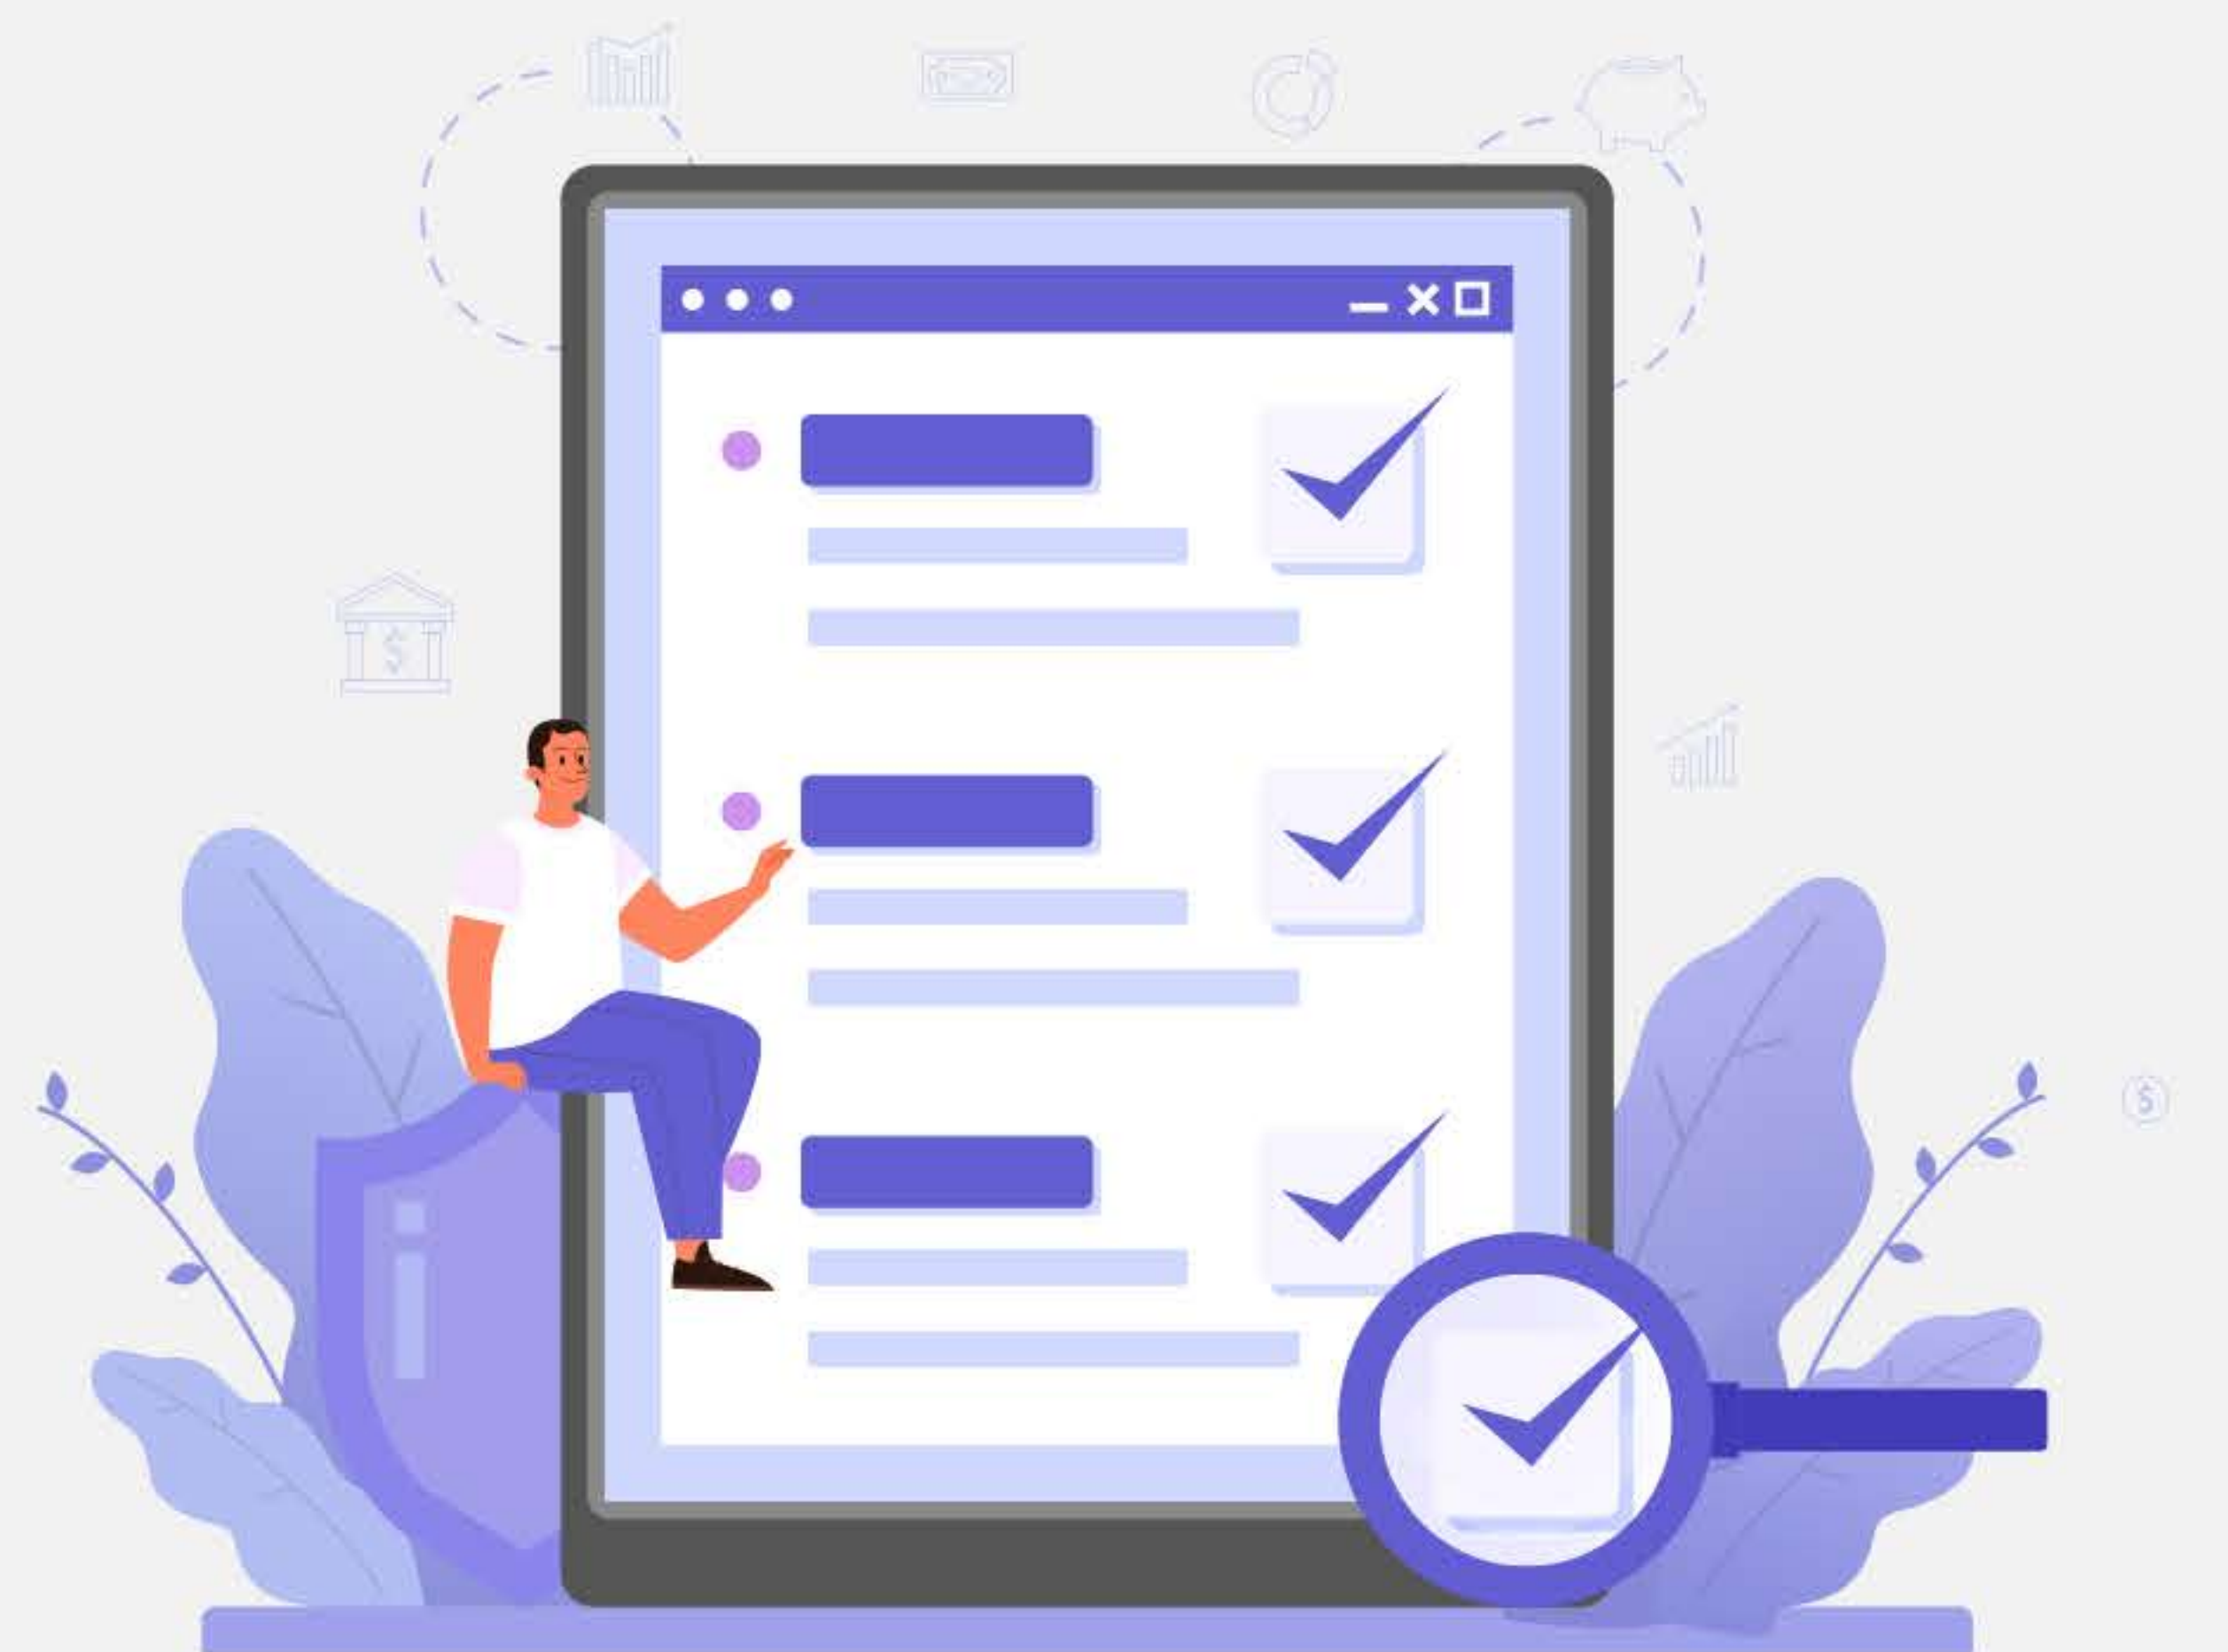

HOW TO GET IT?

1. Buy the token;
 - Buy the token quantity equal to the card you want to get
 - Lock the tokens
 - You'll get the Jiffy Membership according to your locked tokens.
 - Activate the jiffy loyalty card according to the membership chosen.
2. Buy the Card;
 - Buy the cards according to the membership you want
 - Add the tokens to your wallet
 - Go to the Jiffy membership system to lock the tokens.
 - Get the card activated

NOTE

In both ways, you'll need to lock the token. Buying of card with a token will only be valid for a limited time. After listing the Jiffy loyalty cards will not give tokens, and the Jiffy loyalty cards website will be for our partner's registration and for the card holders to check the updated offers.

BENEFITS OF JIFFY LOYALTY CARDS:

Jiffy Loyalty cards serve as the key that needs to be activated to participate or enjoy the benefits of the company's project (USASC) and our partners.

1. The Loyalty Cards help holders to enjoy the business special offers from JiffyStock Platforms or our business partners.
2. It is designed to get the best offers and discounts for all the services that have relationships to your life such as Big brands, Hotels, Airlines, restaurants, entertainment, traveling and shopping, and many more,
3. It helps businesses and blockchain communities to get the best of what's available so they can have a clear mind to focus on growing and developing.
4. Forefront access to partnership offers

FUTURE OF JIFFY LOYALTY CARDS:

To ensure consistent provision of maximum offers and discounts supports business, and crypto communities getting charming and luxurious life.

USA SOLUTION CREATORS TECHNOLOGY TEAM

USA Solution Creators Technology (USASCT) is a software development company based in America. We are focused on finding creative solutions to the existing development problems by bringing up-to-date technology and solutions into practice and creating unique products. With a team of highly trained, experienced, and creative people who are equally passionate about creating unique products, we have launched several platform solutions such as JiffyStock. USA Solution Creators Technology has a mission to look for highly creative solutions by using the latest technologies such as artificial intelligence, blockchain technology, decentralized platform development, machine learning, and more. We are focused on developing the marvels of creation that are unparalleled in all dimensions. The focus of USASCT is to provide users with something so simple yet highly functiona

FREQUENTLY ASKED QUESTIONS

RELATIONSHIP BETWEEN THE JIFFYSTOCK PLATFORM, JIFFY TOKEN, AND JIFFY LOYALTY CARD?

While JiffyStock Platforms focus on merging buyers and sellers, fostering business growth and success worldwide., Jiffy tokens will be used to govern transactions on the platform, activate Jiffy loyalty cards, and holders have voting power on some critical conditions. Also, Loyalty cards will focus on fostering business growth and making luxury by getting special offers, and discounts from the company, USASC to our users across the globe.

WHAT IS THE DIFFERENCE BETWEEN JIFFY TOKEN MEMBERSHIP AND JIFFY LOYALTY CARDS?

Jiffy token membership is a system designed for users to lock their tokens by using the blockchain technology, and smart contract in order to activate the jiffy loyalty cards feature and benefits

While Jiffy loyalty cards are similar to gift cards which give their holders offers and discounts according to the card level, the buyer of these cards will get free Jiffy tokens for holding it at the membership system to activate the card.

WHAT WILL I GET IF ASKED TO RENT MY STORE ON THE JIFFYSTOCK PLATFORM?

The rental price will depend on Jiffystock annual package price, at the time you will sign the contract, so your rental funds will not be affected by the package changes

HOW HOLDING JIFFY TOKENS CAN GET ME A HIGH LONG-TERM BENEFIT?

Holding jiffy tokens will give you four major benefits in addition to other benefits like discounts and offers.

1. Free lifetime store and ability to rent it
2. Special offers on all USA Solution Creators Technology future projects.
3. Voting power on some critical decisions.
- 4- enjoying of all offers and discounts will available on jiffy loyalty cards

ARE THERE ANY FEES FOR THE RENTAL STORE SERVICES?

JiffyStock Platform will cut 5% from the Rental store fund as Rental fee services, remaining money will be sent to your wallet using stable currency.

I HAVE 400,000 \$JIFFY, HOW AND WHICH STORE CAN I GET ON THE JIFFYSTOCK PLATFORM?

We have 4 different packages, the highest one is VIP Package. It needs 300,000 \$Jiffy to be locked on the Jiffy membership system. After you locked, you'll get a VIP Jiffy loyalty card which will give you VIP Store on the JiffyStock platform. Then you can use this store for your business or sign a contract to rent it.

WHAT'S THE JIFFY TOKEN LOCK DURATION?

Our smart contract is designed for one year. After one year, your tokens will be back in your wallet, then you can use them to lock again for another one year, or for a lifetime.

WHAT VOTING POWER DO THE HOLDERS HAVE AND TO WHAT EXTENT?

Jiffy token holders have voting power on;

1. Increase or decrease the number of tokens needed to be held on the JiffyStock membership system for the 4 types of memberships we have
2. Voting on a release or not releasing the reversed Jiffy token on our tokenomics system.

NOTE: USA Solution Creators Technology has the right to give more voting power to Jiffy token holders but it can't take the power without making a vote.

CONCLUSION

In a world, advancing daily in technology, and crying out for CSR initiatives, and eCommerce developments. All events, and time running in fast and almost in a jiffy. We are determined to develop, implement, educate and project this technology into the eCommerce or Trading business.

We have targets to cover most of the things people focus on such as;

1. STARTING MY BUSINESS
2. GROWING MY BUSINESS
3. SAVING MY MONEY
4. ENJOYING MY MONEY
5. ENJOYING MY LIFE
6. GETTING LUXURIOUS LIFE
